

Divisibility by 3

Problem

Submissions

Discussions

Given a number of digits **N**, and a number of **N digits**, determine whether the number is divisible by **3**.

Note: Recall that a number is divisible by **3** if the sum of its digits is divisible by **3**.

Input Format

- First line will contain **N**, the number of digits of the number
- Second line will contain the number

Constraints

1. $1 \leq N \leq 10^6$

Output Format

- Print "YES" (without quotes) if the number is divisible by 3.
- Otherwise, print "NO".

Sample Input 0

```
5
12345
```

Sample Output 0

```
YES
```

Explanation 0

The number 12345 is divisible by 3.

Sample Input 1

```
4
1234
```

Sample Output 1

```
NO
```

Explanation 1

The number is not divisible by 3
